This eleventh annual recurring bibliography includes those articles listed in *Index Medicus* from April 1978 through March 1979. Only those articles which focus on education in the health professions and retrieved by the Medical Literature Analysis and Retrieval System are cited. Since this bibliography has been developed specifically for the allied health field, the reader is referred to the following related recurring bibliographies developed by the National Library of Medicine: Bibliography on Medical Education, Index to Dental Literature, International Nursing Index, Anesthesiology Bibliography, and the Bibliography of Epidemiology.

Readers are encouraged to participate in this experimental effort through comments and publication of articles in journals accommodated by MEDLINE.
